CRYPTOLOGIA
VOLUME 13 (1989)

Roland Anderson
61 Cryptanalytic Properties of Short Substition Ciphers
161 Recognizing Complete and Partial Plaintext

David A. August
289 Cryptography and Exploitation of Chinese Manual Cryptosystems - The Encoding Problem

Jeff Belkora
43 Belkoranic Hill Ciphering

Deanne R. Blackman
273 The Gromark Cipher, and Some Relatives

Carl Boyd
193 Anguish Under Siege: High-Grade Japanese Signal Intelligence and the Fall of Berlin

Richard Chandler and Jack Levine
1 The Hill Cryptographic System with Unknown Cipher Alphabet But Known Plaintext

William F. Clarke
118 Post War Organization

John M. Carroll and Lynda E. Robbins
303 Computer Cryptanalysis of Product Ciphers

Mark Davio, Louis C. Guillou, and Jean-Jacques Quisquater
167 Public-Key Techniques: Randomness and Redundancy

CRYPTOLOGIA ANNUAL UNDERGRADUATE PAPER COMPETITION IN CRYPTOLOGY

FIRST PRIZE: Three hundred dollars Closing date: 1 January

Topic may be in any area of cryptology – technical, historical, and literary subjects.

A contest to encourage the study cryptology in the undergraduate curricula.

Papers must be no more than twenty typewritten pages in length, double spaced and fully referenced. Four copies must be submitted. Authors should retain one copy. Papers are to be original works which have not been published previously.

The papers will be judged by the editors of *Cryptologia* and the winner will be announced on 1 April with publication of the winning paper in a future issue of *Cryptologia*.

The competition is underwritten by a generous gift from Boshra H. Makar, Professor of Mathematics, Saint Peter's College, Jersey City NJ.

For information, inquiries, and submissions contact: *Cryptologia*, Editorial Office, Rose-Hulman Institute of Technology, Terre Haute IN 47803 USA.
